Configure Apple IOS Devices for PvnetStudent WiFi Access

**Step 1:** Go to **Settings**, Wi-Fi and select “Other Network”

**Step 2:** Enter “PvnetStudent” and for Security: “None”
Step 3: Open a browser and you will see the following screen: Click Agree to continue.

Step 4: Select PVPUSD account holder on NON-PVPUSD asset—click START.
Step 5: Enter your student username (ID#) and your password for your network computer account

Step 6: Your device will now be registered (this takes approximately 60 seconds).

Step 7: When this step is complete, open a new browser window and you will be able to browse the Internet.
